## Assessment of exemplar

Compare the exemplar to your completed activity. Review your work using each of the criteria in the exemplar. What did you do well? Where can you improve? Use your answers to these questions to guide you as you continue to progress through the course.

**Note:** *The exemplar represents one possible way to complete the activity. Yours will likely differ in certain ways. What's important is that your activity captures the major details of the security incident that you remediated in the capstone.*

Your completed activity should include the following:

- **Executive summary:** Provides 10–20 sentences that details a high-level summary of the data breach.
- **Response and remediation:** Provides 5–10 sentences that correctly identifies each containment, eradication, and recovery action that Cymbal Retail took in response to the data breach. Containment and eradication actions include the isolation of the compromised VM, updated firewall rules, and configuration improvements for the storage bucket. Recovery measures include restoring the VM from a known and trusted

backup, securing the configuration of cloud resources, and enabling logging.

- **Recommendations:** Provides 2–4 recommendations (2–5 sentences each) for improving Cymbal Retail's cloud security.
